**Subject:** Proposition d'une préparation pesticide extrêmement dangereuse - Convention de Rotterdam

Good afternoon Ms. Johnston:

I have received by way of Mr. Bernard Made, Canada's DNA for Industrial Chemicals, the request for information pursuant to Annex IV of the Convention on the Paraquat pesticide formulation "Gramoxone Super". As Canada's DNA for Pesticides, I am pleased to respond to this request.

Though Canada has a similar paraquat formulation registered, it is not identical to the formulation identified below (i.e. Gramoxone Super). Therefore Canada does not have any information to provide on the formulation in question.
